

# Simply exact.

## PRECISE MEASUREMENT TECHNOLOGY FOR GRAVURE CYLINDERS

### DiaMet

Determination of circumference and diameter

### DuroMet

Measurement of copper and chrome hardness

### HelioMet

Determination of engravability

### R-Met

Measurement of roughness

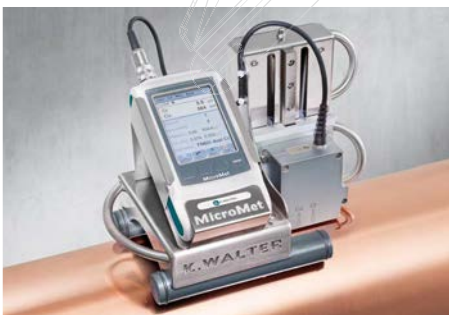

### Rz-Star

Measurement of roughness

### Thickness-Star FE

Measurement of copper layer thickness

### MicroMet

Measurement of copper and chrome layer thickness

### Simple. Fast. Reliable.

Innovative measurement technology for use under production conditions makes a vital contribution to quality assurance. Our extensive portfolio of measurement instruments provides optimal solutions for widely diverse gravure printing needs. You benefit from tools that are simple to operate and return reliable, precise, fast and reproducible results.
